## Grade levels they teach:

## How long they have been teaching:

---

## What our participants say about us:

-This course was amazing! Very informing about finances and economics and its simply a great learning environment.

-This financial workshop has been simply amazing. I'm walking away with a 'BUCKET FULL' of tools and ideas to help build my students understanding regarding Financial Literacy, understanding money, making wise money choices, and planning for their retirement! I would recommend this course to all my teacher friends and my students' parents.

-This workshop is an incredible opportunity that not only will teach you how to teach economics and personal finance, but it also adds so much value in your life through all the resources, information, and sponsorships.

-The 2023 EECE Summer Workshop was absolutely phenomenal! As a teacher preparing to lead a financial literacy focus group, I was in need of guidance and direction. This transformative workshop not only provided me with basic understandings of Economics, but also ignited a passion within me -- equipping me with the invaluable insights and tools necessary to make a lasting impact on my students' financial education.

-I have learned a lot in these 5 short days! The difficult concepts of economics was brought down to my level.
